

KY409 OTTOMAN BED

Thank you for your purchase. The following care instructions will allow you to make the most of your bed; helping to prolong the look and life of it by preventing wear and damage.

IMPORTANT INFORMATION

PLEASE ENSURE YOU READ THIS LEAFLET BEFORE USING YOUR BED. DO NOT DISCARD OF ANY PACKAGING UNTIL YOU HAVE CHECKED THE PRODUCT THOROUGHLY.

This bed can be assembled as and END LIFT OR SIDE LIFT OTTOMAN, please ensure you follow the correct steps for your desired lift.

CARING FOR YOUR BED

- Pre-brush any fabric with a soft brush and then gently vacuum.
- Use a microfibre cloth to remove dust from wooden surfaces.
- In the event of a spill or stain, use specialist cleaning services.

SUNLIGHT AND HEAT DAMAGE

- Avoid contact with direct sunlight. If needed, move items or change their position to avoid the same area being exposed to repeated sunlight/heat.
- Do not place your bed close to fire places and/or radiators.
- Hot objects such as mugs/plates can permanently mark fabric and wood, avoid placing these on the bed.
- Do not allow children or pets to climb or jump on the bed.
- Avoid contact with sharp objects such as buckles, toys and jewellery as these can easily snag, tear, pull and/or scratch the fabric/wood.

IMPORTANT NOTICE

OTTOMAN OPERATING INSTRUCTIONS

Once your bed frame is completely assembled the slat unit will not operate correctly unless a mattress is placed on the slat frame. Position the mattress on the slat frame whilst it is in the closed position.

Operate the strap handle to open and close the ottoman. PLEASE NOTE - it takes a lot of force to make the initial movement of the ottoman. This is a design feature of the product so it does not fall shut - the nearer to being closed the ottoman is, the easier it is to move. When the ottoman is almost shut it will close completely under its own weight.

When lowering the slat unit for the first time, take care to make sure it does not rub unevenly on the inside face of the side rails. If it does, the bed has been assembled slightly out of square. This can be reflected by moving the foot end of the bed slightly to the left or right whilst leaving the head end stationary.

PISTONS

The pistons used in the construction of this product are extremely strong and cannot be operated by hand when taken off the ottoman. All pistons are tested for correct pressure and operation before being attached to the slat unit.

Initially it might appear that the pistons are very stiff when opening and closing the ottoman - THIS IS PERFECTLY NORMAL.

After operating the ottoman a few times, the movement of the pistons and the opening and closing of the ottoman will become easier.

WARNING

For the safety of yourselves and others, please ensure that:

- Only the handle is used when lifting and lowering the frame. Failure to comply with this warning may result in injury and finger entrapment.
- The handle is attached and always left visible on the outside of the bedstead frame.
- The metal frame is fully raised in the full 'Up' position before using the ottoman space, otherwise the frame could close (fall) or open (spring up) causing injury.
- Children and pets are not left unattended when the frame is in the lifted position as they could become trapped inside the ottoman space.
- Please keep children and pets away from the ottoman bedstead whilst opening and closing the slat frame to avoid injury.
- The items store under the bed - i.e. the top of an item must not touch the underside of the mattress metal frame base or it may get damaged.

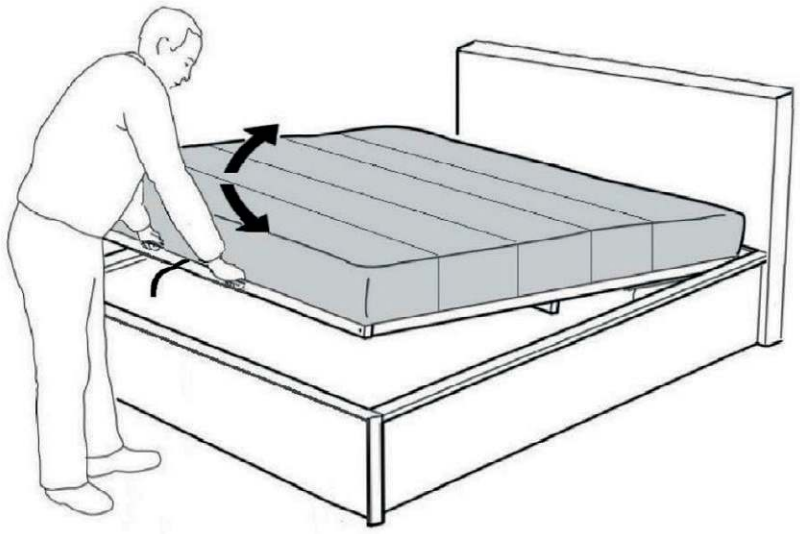

Hints and Tips

Failure to do so may result in injury.

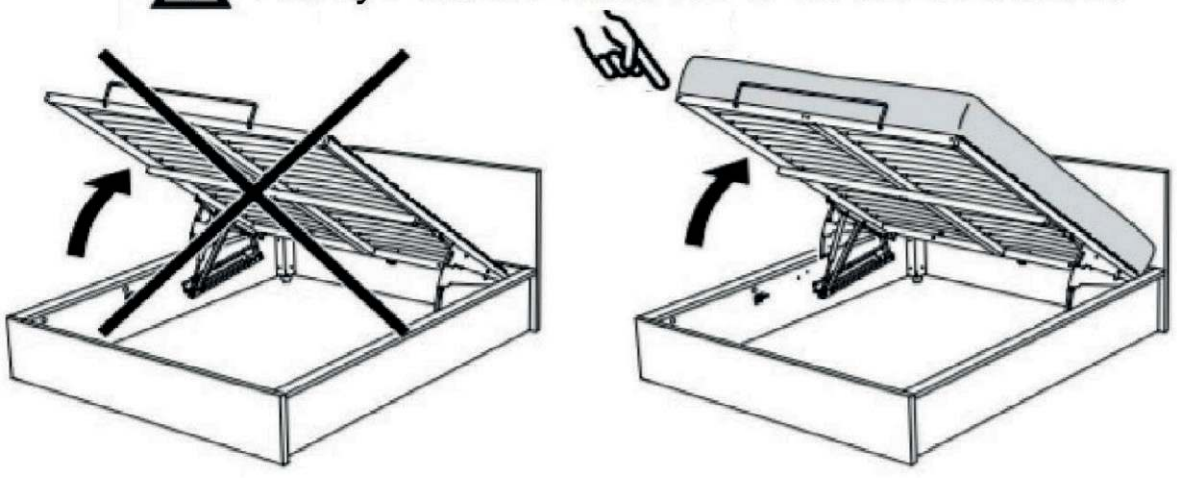

To operate the ottoman, always use two hands at arm's length to push down on the bed frame end, in between the 2 rows of slats (as shown below) to close the bed frame.

To open, lift up using the nylon strap on the bed end.
You must always ensure the mattress is on the bed frame before lifting to open and close the bed frame.

The weight of the mattress loaded on the frame helps to close the bed frame easier and with less effort, also keep the frame in closed position until it is pulled upwards by user.

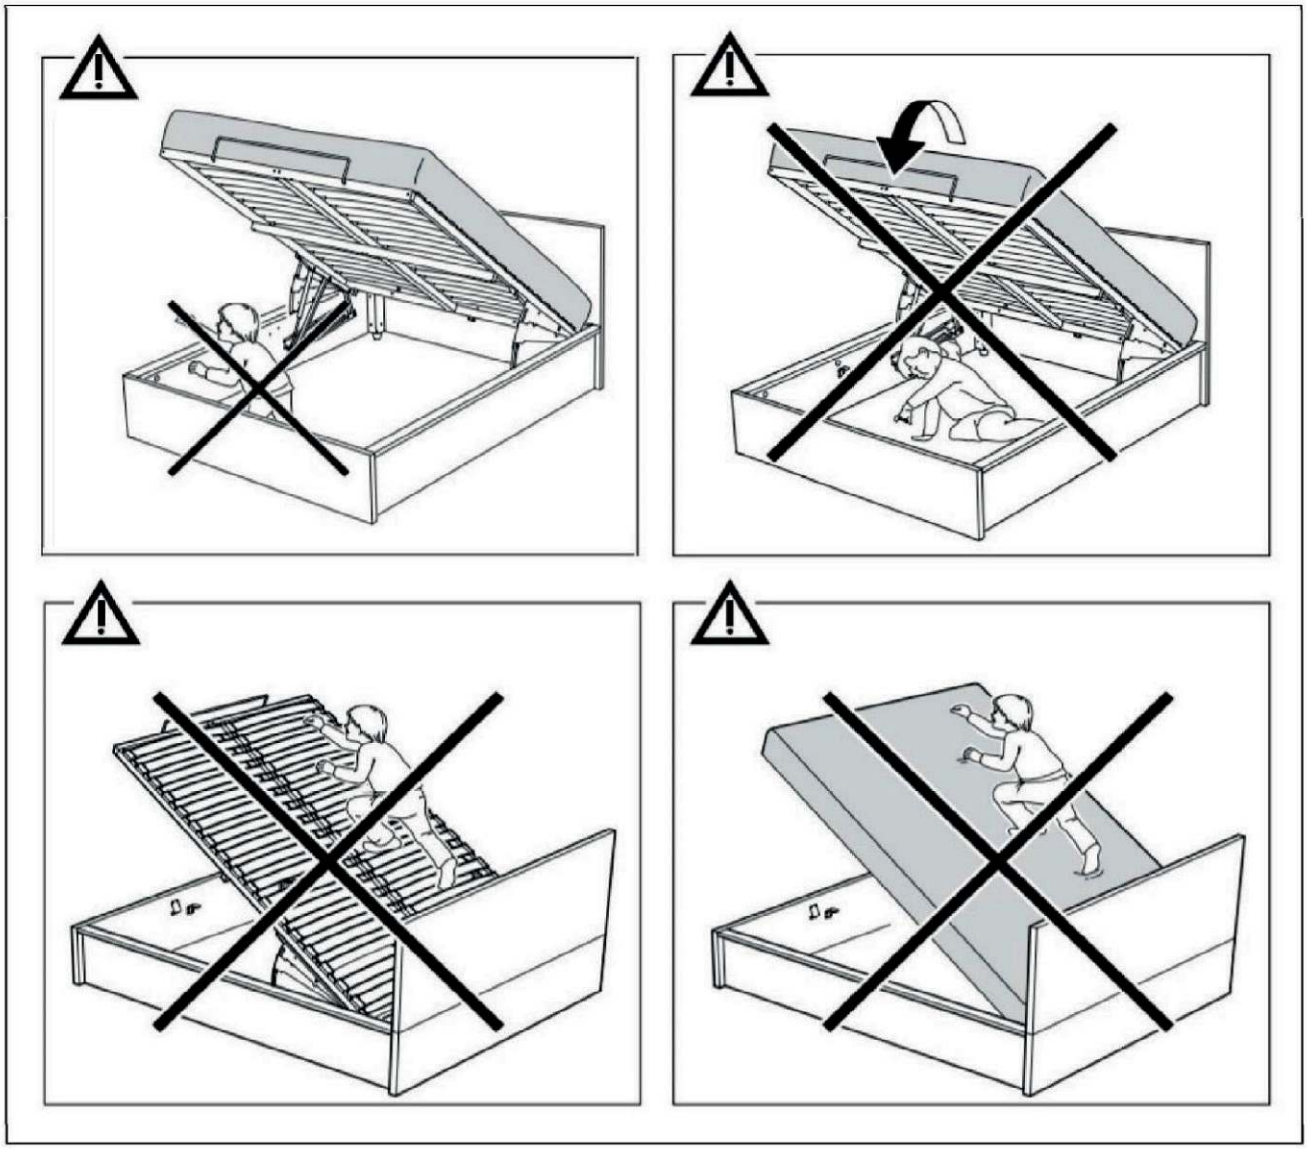

⚠ Always ensure Mattress is on the bed frame

Hints and Tips

Failure to do so may result in injury.

Bed frame must be in CLOSED position,
with Mattress on the bed when moving the bed.
